

REMARKS

Claims 8, 9, 12 and 13 stand rejected over the prior art. Applicant gratefully acknowledges that the examiner has indicated that claims 10, 11 and 14 contain allowable subject matter. Claim 8-14 have been canceled and new claims 15-19 have been added. The new claim 15 combines the subject matter of the previous claims 8 and 10 and the new claim 18 combines the subject matter of the previous claims 12 and 14. Applicant therefore believes that the new claims 15 and 18 are patentable and it follows that the dependent claims also are patentable.

Applicant has taken the opportunity to correct an obvious error at page 6, line 17, of the specification. It is clear from the drawing that the water-glycol mixture does not pass through the bypass conduit 3.10 but that gas from the tank 4 passes through the bypass conduit in order to pass by the heat exchanger 3.7.

Respectfully submitted,

---
